

# NEW STANDARD PLAZA TYPE SKATEPARKS!

# SMALL AREA

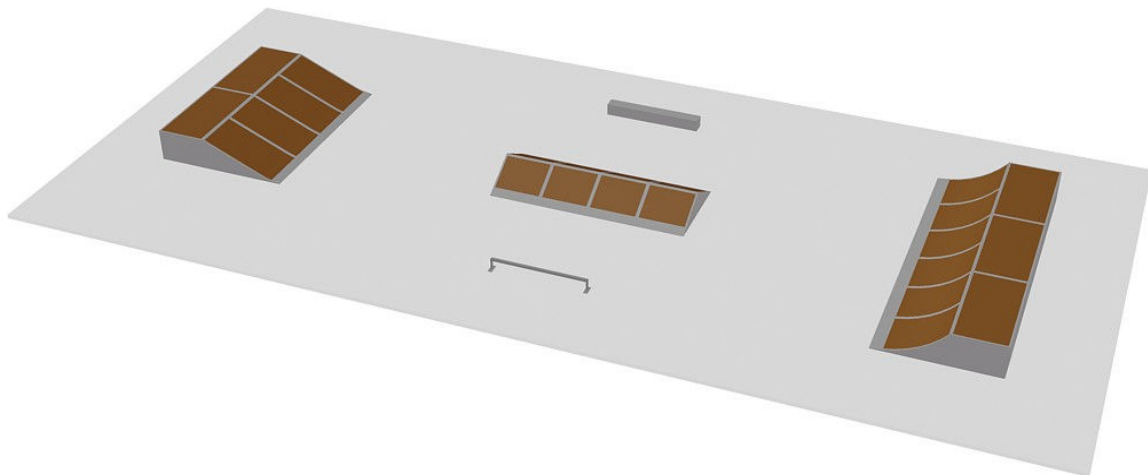

## STANDARD SKATE PARK A5, 2015-1

Nice little park for both advanced skaters and inexperienced skaters. Good for manual-tricks, flip-tricks, transition-tricks, grinds, sliding, etc. The space is used as much as possible and yet it is not too full.

## STANDARD SKATE PARK A6, 2015-1

This is perhaps a slightly more difficult skate park as standard skate park A5, 2015-1, but also accessible for any type of skater. Transition-tricks, grinds, sliding, flip-tricks,... are just a few possibilities.

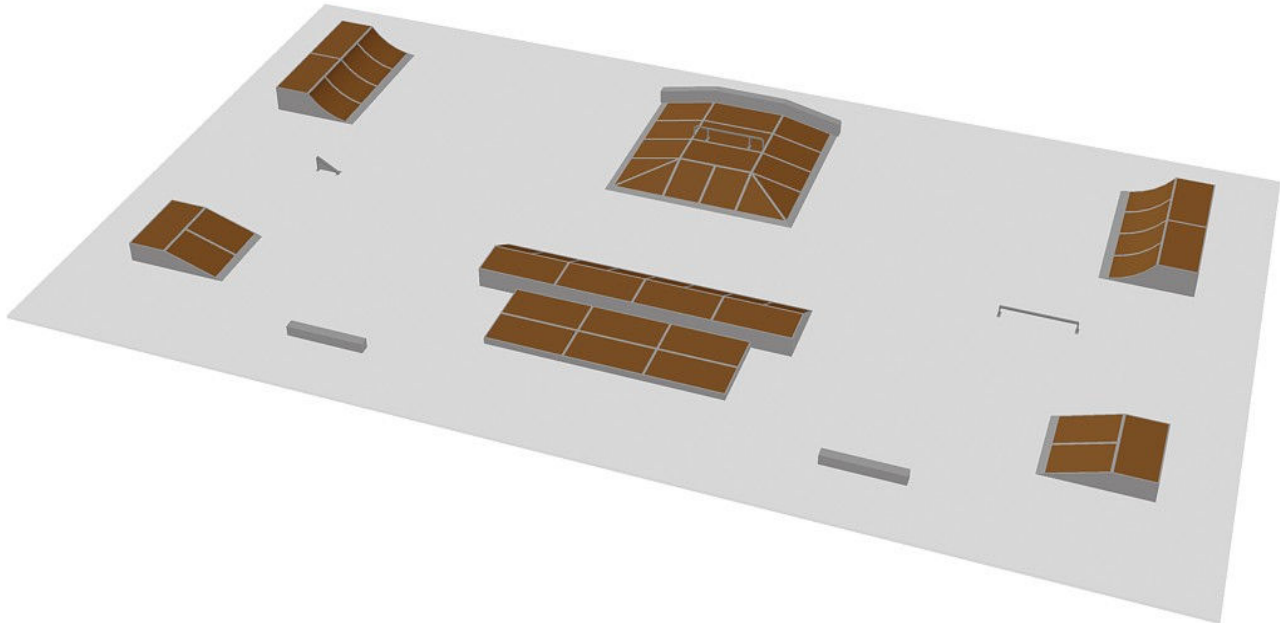

# MEDIUM AREA

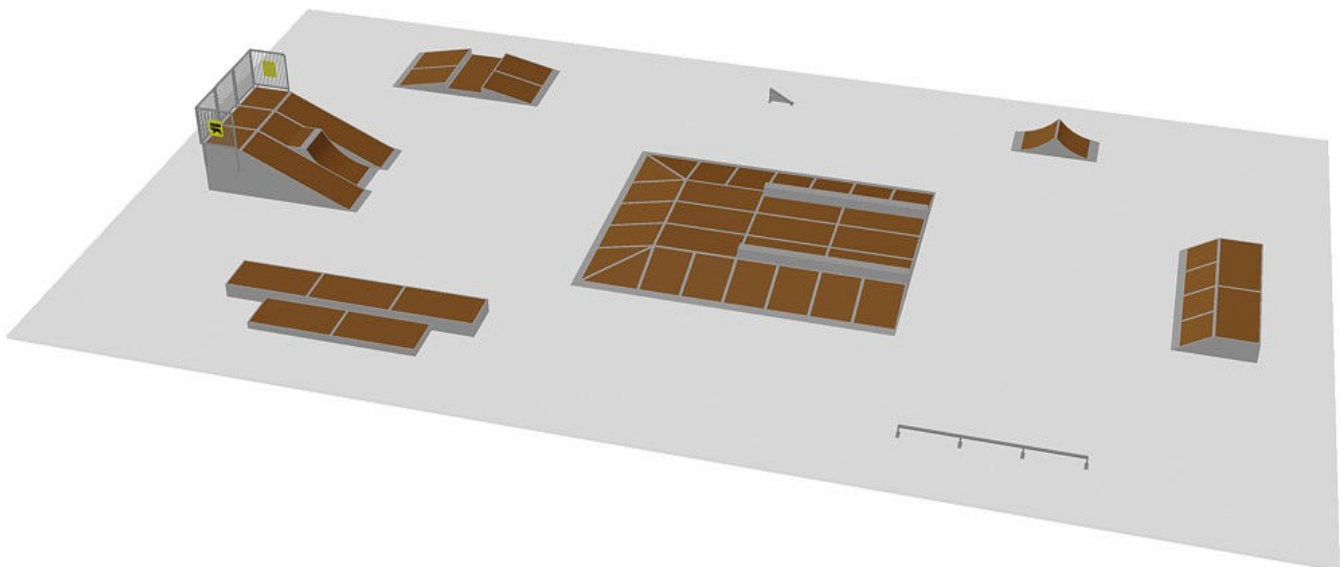

## STANDARD SKATE PARK C3, 2015-1

This skate park offers a lot of variation! Fun park for beginning and more advanced skaters, with nice skate lines. Skate park would also be suitable for competitions.

## STANDARD SKATE PARK C4, 2015-1

Also a skate park with lots of variety and great opportunities to do. Fun park for beginning and more advanced skaters!

# LARGE AREA

## STANDARD SKATE PARK E3, 2015-1

This skate park offers the most variation and is the personal favorite of Slick! There is a 20 cm high concrete platform which gives a skate plaza feeling and the halfpipe is a nice extra. This skatepark would be great for competitions and any type of skater can feel at home!

# PROMO!!!

## STANDARD SKATE PARK E4, 2015-1

This skatepark is the toughest skate park and gives a lot of fun for advanced and experienced skaters. The grindrails and pyramid combination are fun for advanced skaters and located that they won't disturb experienced skaters when using the higher ramps. Skate park can be used for competitions!
